

Dear pastor,

Thank you for taking time to review this letter. When it comes to online sexual temptation, today we live in a particularly difficult and ominous time. Internet pornography is the # 1 problem facing Christians and the church today. It is an addictive substance that brings difficulty, divorce, and great harm to hundreds of thousands of people each year. Covenant Eyes is recommended by "Focus on The Family", "Promise Keepers" and "Precept Ministries International", among many others across North America.

**After reviewing the enclosed information, we strongly recommend the following to you for your immediate action.**

- 1.) Protect your church and your leaders' Internet integrity by enrolling your staff on Covenant Eyes. We offer reduced pricing for church and ministry staff. Provide direct Internet accountability for all of their online use. Reduce risk and liability issues for staff, congregation members and the church related to sexual misconduct, stemming from viewing Internet pornography.
- 2.) Take steps to fully inform and educate the men, families, and members in your church regarding the tremendous danger that is present on the Internet. With the simple 'click' on the computer, a person can be viewing the most insidious, harmful hard-core pornography, right in your home or office. Because computers are used in private, unaccountable settings, everyone using the Internet, without effective Internet safety protection is being adversely affected by Internet pornography.
- 3.) Alert and inform your church families and members about the extreme Internet danger and about Covenant Eyes. Request our **free support materials**, which include: Power point presentation, brochures, CE benefits and features, testimonials and other helpful documents. Educating and informing people is the surest way to encourage them to take action. **Preventing** people from ever getting this problem is vital. Covenant Eyes removes the secrecy and temptation of the Internet by establishing Internet Accountability. Covenant Eyes is effective.
- 4.) Special offers to encourage people to safeguard their online use are available when addressing large groups and congregations. Contact Covenant Eyes at [resources@covenanteyes.com](mailto:resources@covenanteyes.com).
- 5.) Encourage those who are struggling with Internet pornography to immediately find an accountability partner and sign up to Covenant Eyes as a first step in the process of overcoming this sin.
- 6.) Place the Covenant Eyes logo/ banner onto your website where church members can be encouraged to visit, and learn more about Covenant Eyes.
- 7.) Pass out Covenant Eyes brochures to area pastor groups and other church leaders in your city and denomination. Help spread the news and encourage Internet Integrity through Accountability.

Taking action to educate and alert staff and congregation members will help safeguard their online activity and is of **paramount importance.**

**Contact our office** to obtain our FREE resources and brochures and to explore how we may serve you. 1-877-479-1119 opt 3, or by email: [resources@covenanteyes.com](mailto:resources@covenanteyes.com).

God's grace and peace to you,

The Covenant Eyes Team
